

Stainless Steel Flexible Conduit (AT)

SquareLok Style (SL)

SquareLok tubing is produced from a continuous metal strip, and is held in position by locking one leg of one profile over the leg of the adjacent profile.

Trade Size	Inside Diameter	Outside Diameter	Weight	Breaking Load Min	Part Number
1/8" 3.5mm	0.140" 3.5mm	0.200" 5.1mm	0.017lb/ft 0.026kg/m	60lbs. 27kgs	AT-SL-002

Fully InterLok Style (FI)

InterLok metal strip and the edges of the strip are completely interlocked with each other. This offers increased crush protection, and higher axial strength.

Trade Size	Inside Diameter	Outside Diameter	Weight	Breaking Load Min	Part Number

* Maximum size we could produce= 6"(about 150mm). For bigger sizes or custom sizes order, please send us your detailed requirement.

TYPE: AT-SL-JACKETED

The PVC covering is applied onto the metal surface with a **Vacuum process**. The finished surface will have a spiral corrugated pattern. It is most suitable for tight-spot installation and where a certain water tightness is required

Liquid-tight

TYPE: AT-SL-EXTRUDED

The PVC covering is **extruded** onto the conduit metal surface, thus producing a **smoother** finished surface. when used with liquid-tight fittings it offers a **higher degree of liquid tightness** than the vacuum jacketed type.

Flexible Stainless Steel Conduit: Type AT is an ultra-flexible, stainless steel conduit designed primarily for OEM applications. A typical application would be armouring in specialty sensing devices, or medical equipment, including fiber-optics.

Delikon Small Bore Stainless Steel Flexible Conduit and Conduit Fittings & Connectors offer protection for vital Telecommunication, Sensors, Thermalcouplers or Laser Equipment cables.
